

Type the symbols your job actually uses.

Not a speed test. Not a game.
Keygarden drills the brackets, operators,
and shortcuts your field runs on.

Start here. Calm, no pressure.

Pick your field before you're asked to type anything.
Orient first, practice second.

Shot 2

(PNG from Claude Code goes here)

Six fields. Your symbols, not some generic list.

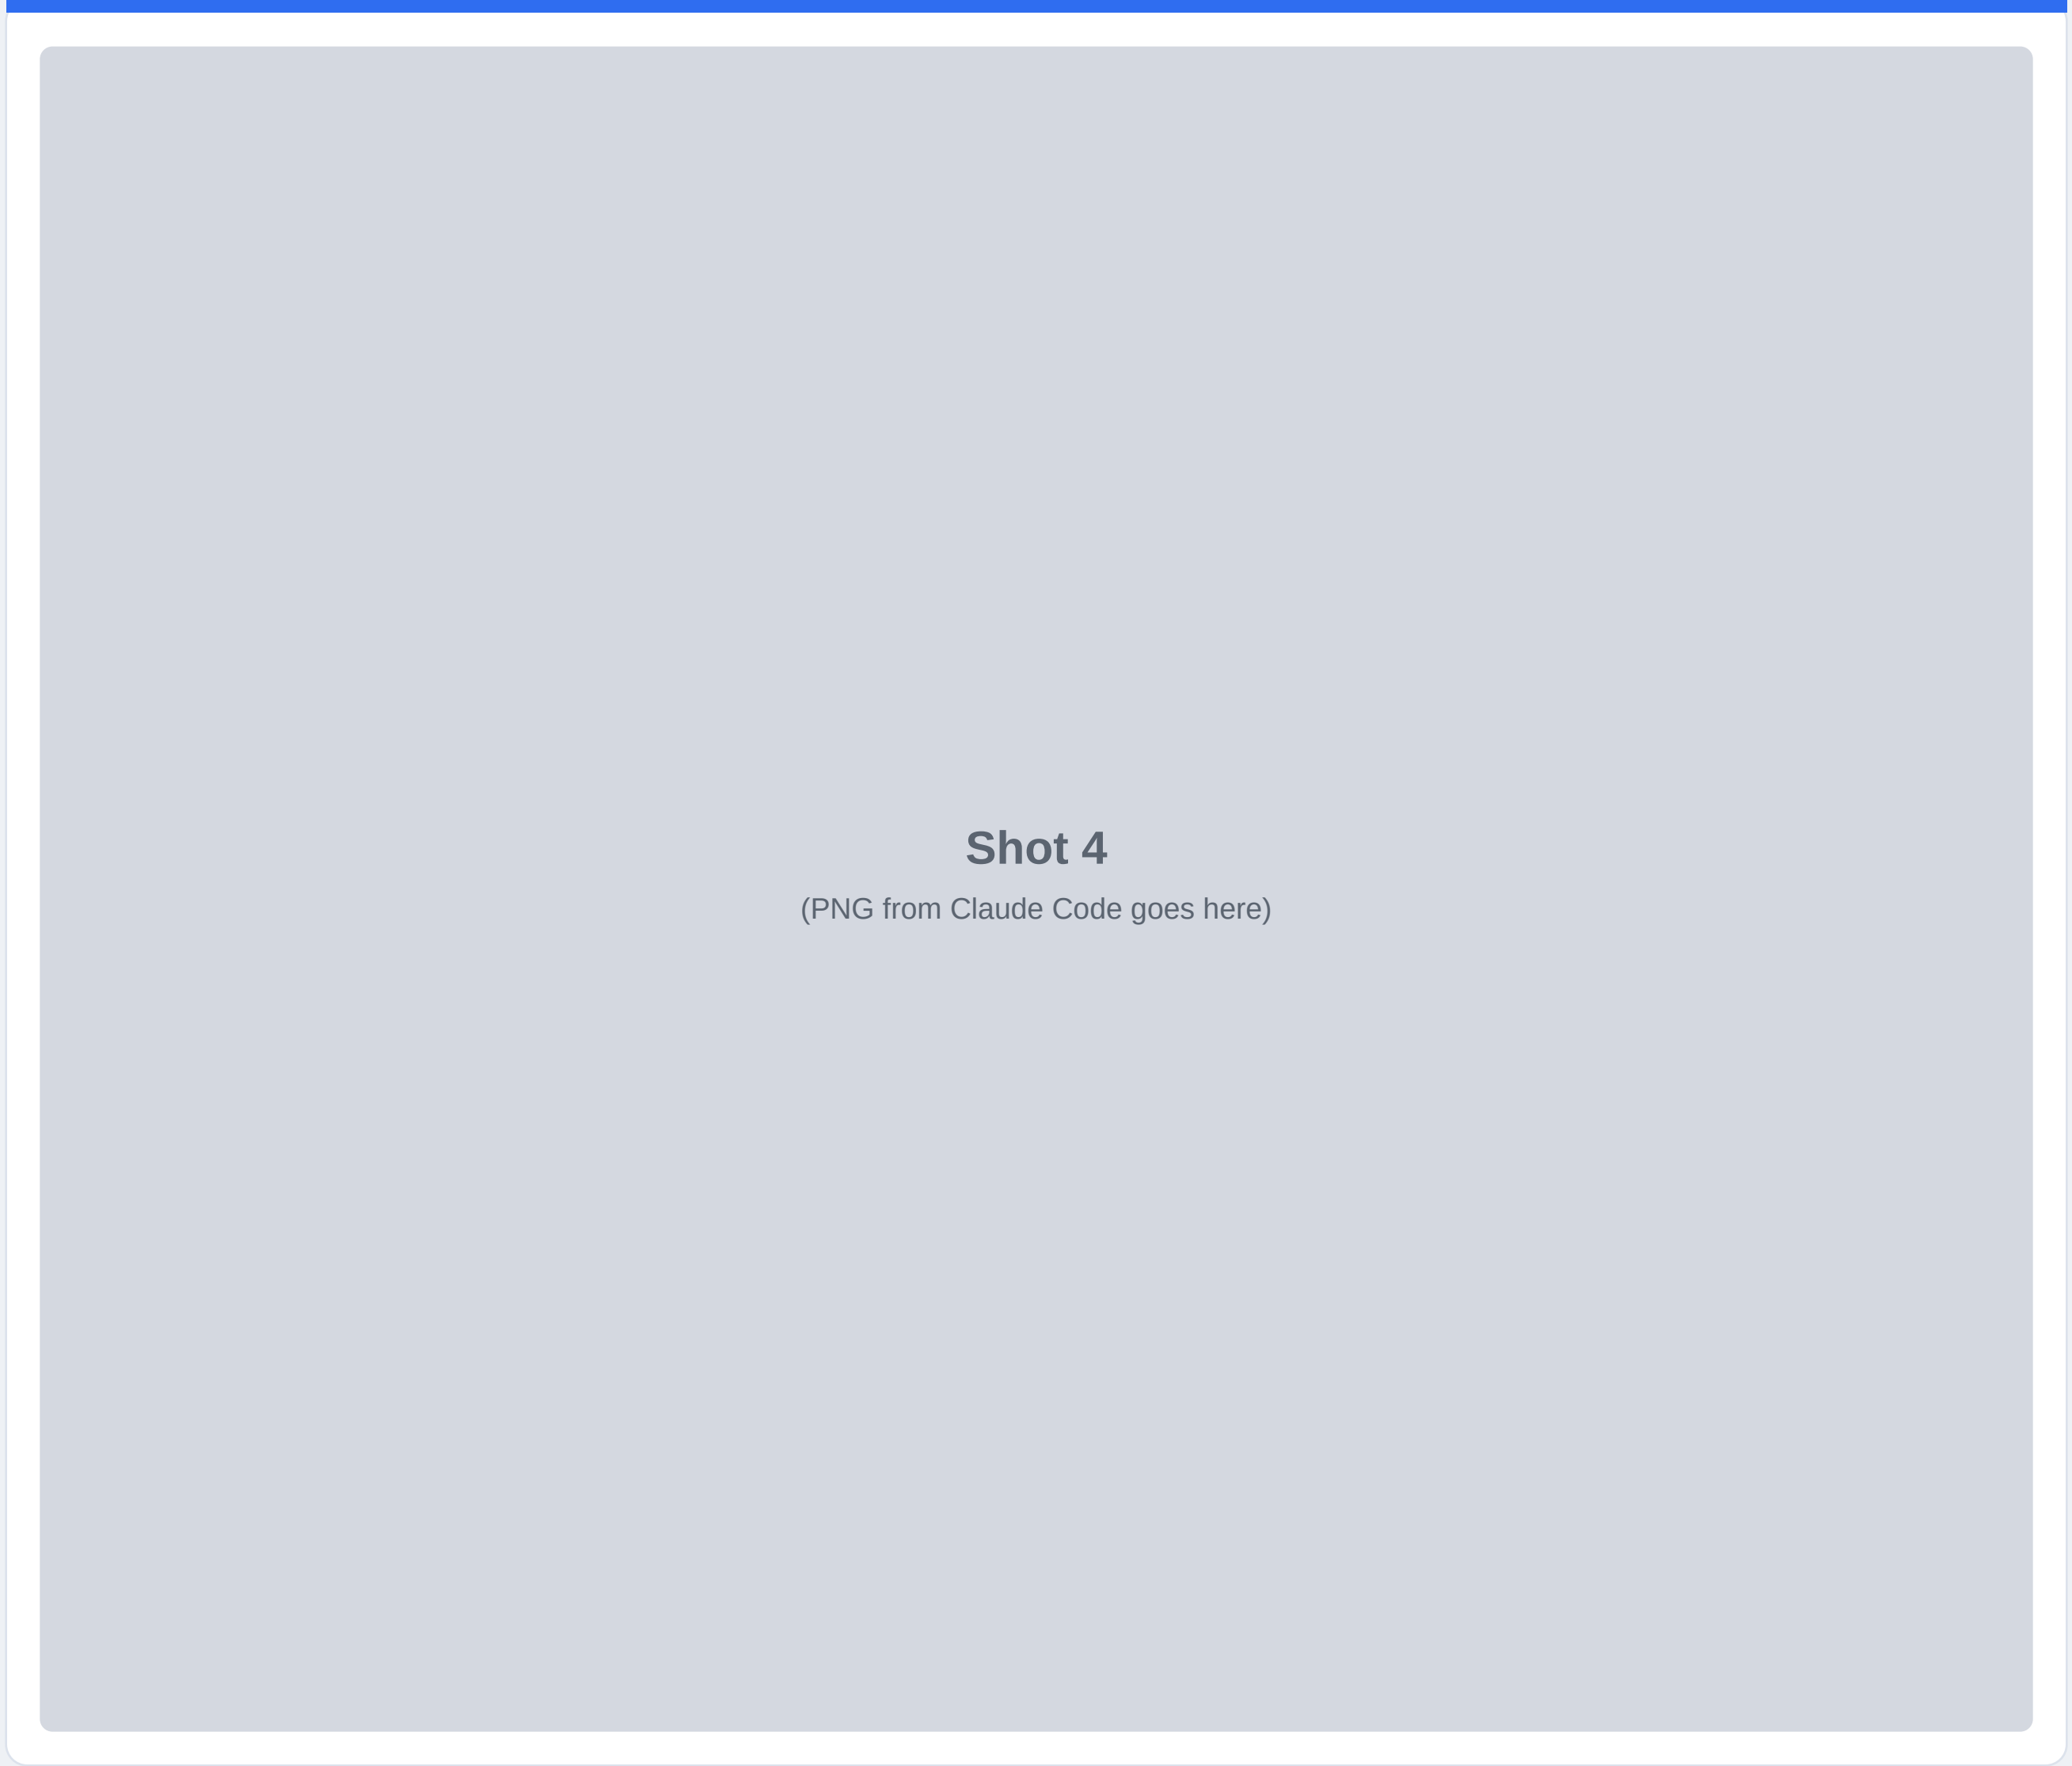

Data & Analytics · Software/Web · Healthcare · Finance · Cybersecurity · General
Each one ships with its own symbol set and real-world snippets.

Shot 3

(PNG from Claude Code goes here)

One symbol at a time. Easiest first.

Warm up on individual keys, then graduate to words, phrases, and full lines.
The order adapts to the keys you actually fumble.

Shot 4

(PNG from Claude Code goes here)

Missed a key? You'll know exactly where to go.

Spatial coaching names the direction. The on-screen keyboard shows the finger.
No vague 'try again' — just clear, direct guidance.

Shot 5

No timer. No score. Just a garden that grows.

A biodiversity garden unlocks as you practice — birdbaths, bee houses, native oaks.
Nothing wilts. Nothing decays. No guilt cycle.

Try it free →

Free. Offline-ready. Installs in one click.

No login. No tracking. No timer.
Just the practice.
